MUHAMMAD KASHIF SHABEER

Full-Stack Software Engineer | Web & Mobile | React Native | Flutter | Next.js | Node.js | Python | FastAPI
+92 301 1424851 | kashifkhan26262@gmail.com | linkedin.com/in/muhammad-kashif-shabeer | Multan, Punjab, Pakistan

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 4+ years of experience designing, building, and shipping production web and mobile applications end-to-end — from React/Next.js web dashboards and marketing sites to cross-platform React Native and Flutter apps on iOS and Android, backed by Node.js, Express.js, and Python/FastAPI services. BS in Information Technology from Ghazi University (2023). Delivers complete products across the stack: responsive web frontends, desktop apps (Electron), mobile clients, REST/GraphQL APIs, real-time communication (Agora SDK, Socket.io), payment and subscription systems (Stripe, RevenueCat), AI/LLM integrations (LangChain), and cloud infrastructure (AWS Amplify, Cognito, AppSync, MongoDB, PostgreSQL, Supabase). Leverages AI-assisted development tools — Cursor, GitHub Copilot, and Claude Code — to accelerate delivery without compromising code quality. Proven track record shipping to the App Store, Google Play, and production web/desktop deployments in agile, remote, cross-functional teams.

TECHNICAL SKILLS

- **Web & Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), Redux, React Query, HTML5, CSS3, Tailwind CSS, Electron (desktop apps)
- **Mobile:** React Native, Flutter, Android (Java/Kotlin), iOS, Expo CLI, EAS Build
- **Backend & APIs:** Node.js, Express.js, Python, FastAPI, REST APIs, GraphQL, WebSockets
- **Databases:** MongoDB, Firebase Firestore, PostgreSQL, Supabase, Pinecone (Vector DB)
- **Real-Time & Payments:** Agora SDK (Audio/Video/Streaming), Socket.io, Stripe, RevenueCat (IAP & Subscriptions)
- **Cloud & DevOps:** AWS Amplify (Cognito, S3, AppSync), Firebase, Vercel, Git, GitHub, CI/CD, Docker
- **AI/LLM:** LangChain, Vector Search (Pinecone), Prompt Engineering, LLM-Integrated Workflows
- **AI-Assisted Development:** Cursor, GitHub Copilot, Claude Code, ChatGPT
- **Testing & Tools:** Jest, Postman, Agile/Scrum

PROFESSIONAL EXPERIENCE

Full-Stack Developer — Web, Mobile & Backend **September 2025 – Present**
Naqvid | Multan, Punjab, Pakistan

- Lead end-to-end product development across web, mobile, and backend, building React.js/Next.js web applications and dashboards alongside cross-platform React Native apps for a growing web, Android, and iOS user base.
- Designed and built the company's own corporate website (naqvid.com) and multiple client web platforms, including a construction management system and a property management/inspection system, deployed on Vercel.
- Design and maintain backend services and REST APIs using Node.js, Express.js, and Python/FastAPI, with MongoDB for data modeling and query optimization to keep response times fast under load.
- Architect real-time chat, live notifications, and event broadcasting features using Socket.io, supporting low-latency communication at scale across web and mobile clients.
- Integrate RevenueCat for full subscription lifecycle management, including free trials, upgrades, renewals, and cancellation flows, improving subscription conversion and retention.
- Build and maintain a shared UI component library across web and mobile, cutting new-feature development time across the team.

Full-Stack Developer — Mobile, Web & Backend **April 2026 – August 2026**
RayTech Labs Inc. | Canada (Remote)

- Worked as a full-stack developer across mobile, web, and backend, building cross-platform mobile applications with React Native and TypeScript alongside web-facing features and backend services for the product.
- Designed and maintained backend services and APIs using Node.js and AWS AppSync (GraphQL), applying reusable component architecture and centralized state management to speed up feature delivery across clients.
- Integrated Agora SDK for real-time audio/video calling — including group calls, host/audience modes, mute controls, and screen sharing — delivering stable, low-latency call quality in production.

- Implemented Stripe payment gateway for secure checkout, recurring billing, and transaction management; configured RevenueCat for in-app purchases and subscription entitlements, streamlining end-to-end monetization.
- Utilized AWS Amplify for cloud infrastructure including Cognito authentication, S3 storage, and AppSync (GraphQL) API integration, improving API reliability and reducing backend maintenance overhead.
- Conducted code reviews, wrote unit/integration tests, and maintained CI/CD pipelines, reducing production incidents and enabling faster, more reliable release cycles.
- Used AI-assisted development tools including Cursor, GitHub Copilot, and Claude Code to speed up boilerplate generation, refactoring, and debugging, improving day-to-day development velocity.

React Native Developer **October 2023 – September 2025**
MaxRemind Inc. | Pakistan (Remote)

- Developed and shipped multiple production React Native apps to the App Store and Google Play, owning the full release cycle from build to submission.
- Integrated Stripe for one-time payments, recurring subscriptions, and card tokenization; implemented Agora SDK for in-app voice and video calling in production apps.
- Built real-time notifications and live data sync features using Socket.io, improving user engagement and measurably increasing app responsiveness.
- Optimized React Native performance via lazy loading, FlatList virtualization, memoization, and image caching, noticeably reducing app load times.
- Participated in agile ceremonies, wrote Jest unit tests, and reduced regression bugs through structured code reviews.

React Native Developer **June 2024 – February 2025**
Triotech Systems | Pakistan

- Built cross-platform React Native mobile apps for multiple clients, translating requirements and design mockups into functional software.
- Implemented navigation, form validation, and state management using React Navigation and Redux Toolkit/Context API.
- Integrated REST APIs, Firebase push notifications, and social logins (Google, Apple, Facebook) across projects.
- Refactored legacy code, fixed bugs, and optimized performance to improve app stability and reduce technical debt.

FEATURED WEB PROJECTS SHIPPED

Priced Ug — pricedug.com
Business directory and marketplace website for Uganda; lets users browse local shops by category, see real product pricing in UGX, and reach business owners directly by phone.

Hi-Bots — hunziker-inspirationen.app
Cross-platform AI coaching web and desktop app built with Next.js, Electron, LangChain, and MongoDB, featuring German-language chat bots, subscription billing via RevenueCat, and signed desktop releases.

Construction Management System — construction-system-sage.vercel.app
Web platform for managing construction projects, workflows, and records; built and deployed with Next.js on Vercel.

Transporter — transporter-new.vercel.app
Fleet management web app for tracking drivers, customers, and vehicle fleets in real time.

Naqvid — naqvid.com
Corporate website for Naqvid, an IT services company; designed and built to represent the company's services and portfolio.

Property Inspection System — project-inspection-one.vercel.app
Web application for managing property inspections and records, streamlining reporting for property managers.

FEATURED MOBILE APPS SHIPPED

Priced Ug — Business Directory & Marketplace App — play.google.com/store/apps/details?id=com.pricedug.mobile
Built the companion Android app for Priced Ug, a business directory and marketplace for Uganda, letting users browse shops by category and location, filter and sort listings, and view real product pricing in UGX; live on Google Play.

Nutriwork — AI Nutrition & Workout Suggestion App — apps.apple.com/pk/app/nutriwork/id6738423604

Built the mobile app end-to-end, delivering AI-driven nutrition tracking and personalized workout recommendations; live on the App Store.

Lure — AI Facial Analysis & Self-Improvement App — apps.apple.com/us/app/lure-get-hot-on-purpose/id6758293200
Developed core app functionality integrating AI-powered facial analysis with personalized, task-based improvement plans; live on the App Store.

Anaesthesia Companion App — apps.apple.com/us/app/anaesthesia-companion-app/id6761999497
Built a specialized educational reference app for anaesthesia professionals, structuring complex clinical content for fast, reliable in-app access; live on the App Store.

MaxRemind Charts — Medical Billing App — apps.apple.com/pk/app/maxremind-charts/id6479510772
Developed a medical billing app streamlining charge capture and billing workflows for healthcare providers; live on the App Store.

Scoolus — Multilingual Vocabulary Learning App — apps.apple.com/us/app/scoolus/id6737978125
Built a gamified vocabulary-learning app with interactive lessons and progress tracking to help users build language skills; live on the App Store.

EDUCATION

Bachelor of Science in Information Technology (BS IT)
Ghazi University, Dera Ghazi Khan | September 2019 – September 2023
